4397_Twitter_Sentiment

Requirements

- Python 3.8.12+
- Anaconda 4.10.3+

Setup Instructions

1. Download and unzip the project files.
2. Open Anaconda Navigator, click on the Environments tab, and click Import.
3. Select the "Local drive" option, locate the `environment.yml` file, and click Import. This will configure the Anaconda environment and install the required dependencies.
4. Activate the environment if it is not already and run the `twitter-video-sentiment.ipynb` notebook with whatever software you prefer (Jupyter Notebook, Visual Studio Code, etc.)
